A One Stop Solution for the Jewelry Ecosystem

Diaspark Jewel ERP is the only solution of its kind in the “enterprise application” space: a suite of software modules specifically tailored and fine-tuned for radically different business processes in the jewelry ecosystem.

Diaspark Jewel ERP provides a single shared environment and empowers every business process - from sales order handling, jewelry and diamond inventory management, production planning and management to packaging and invoicing in real time. Its superior technical architecture creates a consistent and centrally managed data. High level integration across processes ensures that functional departments operate efficiently and effectively. Diaspark Jewel ERP can easily be configured and customized to fit the unique needs of individual businesses.

An Industry Specialist

Diaspark Jewel ERP modules are designed to address the unique requirements of the jewelry business:

- Workbag Tracking
- Sales Order Tracking
- Memo Purchase & Sales
- Style Definition
- Certified and Non-certified Diamond Inventory Management
- Jewelry Production Planning
- Integrated Accounting
- Vendor Portal
- RA and Repair Tracking
- Margin Analysis

Rich in Features and Functionality

Diaspark Jewel ERP gives its users access to critical data and complete control over the decision levers of their business. It helps jewelry manufacturers determine what and how much to produce while monitoring inventory, materials pricing, delivery dates and other variables that have a direct impact on their business performance.

Key Features of Diaspark’s Versatile Jewelry ERP System:

- EDI enables electronic transmission of purchase orders and invoices from multiple EDI providers
- Bulk invoicing for EDI sales eliminates the need for manual invoicing
 - Detailed item costing that includes style, casting, finding and diamond
 - Global updates on all styles of gold, diamond and finding
 - Production plan to gauge supply and track the production stage of an item
- Workbag module to accurately track work assigned to the contractor
- RFID (intelligent bar codes) integration provides enhanced security and inventory control
