## Allow your Sales Team to Shine

Your jewelry sales program should be remarkably different in the 21st century. Diaspark's Catalog and Order entry application for iPad brings new technology into play. With the range of business features this tool saves valuable time and adds agility in your sales process.

Barcode interface makes order entry very convenient and simple. These orders reside on iPad as pending orders and get synchronized with your enterprise application on connecting with the Internet. Similarly, open customer orders get updated on iPad.

With the revolutionary Diaspark Jewel Catalog iPad app, you can radically augment the appeal of your products. Sales reps can leverage its flawless features including - 360 degree views of the high end products, fine digital images with magnification options and detailed view of each piece of jewelry. Its innate ability to upload images on the go & showcase upcoming products will help in cutting out crucial time involved in printing catalogs, and create anticipation among your customers -even before the product is launched.
