■ Style and Casting Inventory

■ Features

| | |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Receipt | You can record receipts of the Style/Casting. Multiple units of item receipt. e.g. Each, Pcs, Wt, Carat, Strand and Pair. Flexibility of defining own units for the receipt and issue. |
| Issue | You can record issue of the Style/Casting. You can issue items to other location to maintain location wise stock. |
| Transfer | Transfer stones from one location to another and adjust the stock properly. |
| Physical Inventory | Enter Physical Inventory of the items within a particular period. Later that can be adjusted and posted to update inventory. |
| Physical Inventory Posting | Post adjustment data into Actual Inventory to bring it equal to Physical Inventory. |
| Make Transaction View Only | Transactions that have been entered into can be made as view only to ensure that they are not altered. This can be done for a particular transaction or a range of transactions. |
| Stock Ledger | This gives the complete ledger of Style/Casting. It can be of the following types: By Item#, By Item Category & Item #, By Location & Item#. |
| Stock Report | This gives the total quantity of Style/Casting in stock. You can have stock by Pcs or by Wt. For more than one business unit, you can get stock of individual business unit as well as the consolidated stock of all the business units. |
