

Diaspark EdTech Common Integration Framework aims to provide a common platform for EdTech providers, LMS, SIS and Institutes for exchanging information in standardized format defined by IMS Global and other industry associations. The framework is built with an objective to provide seamless experience to students, teachers and administrators, as they navigate between various systems.

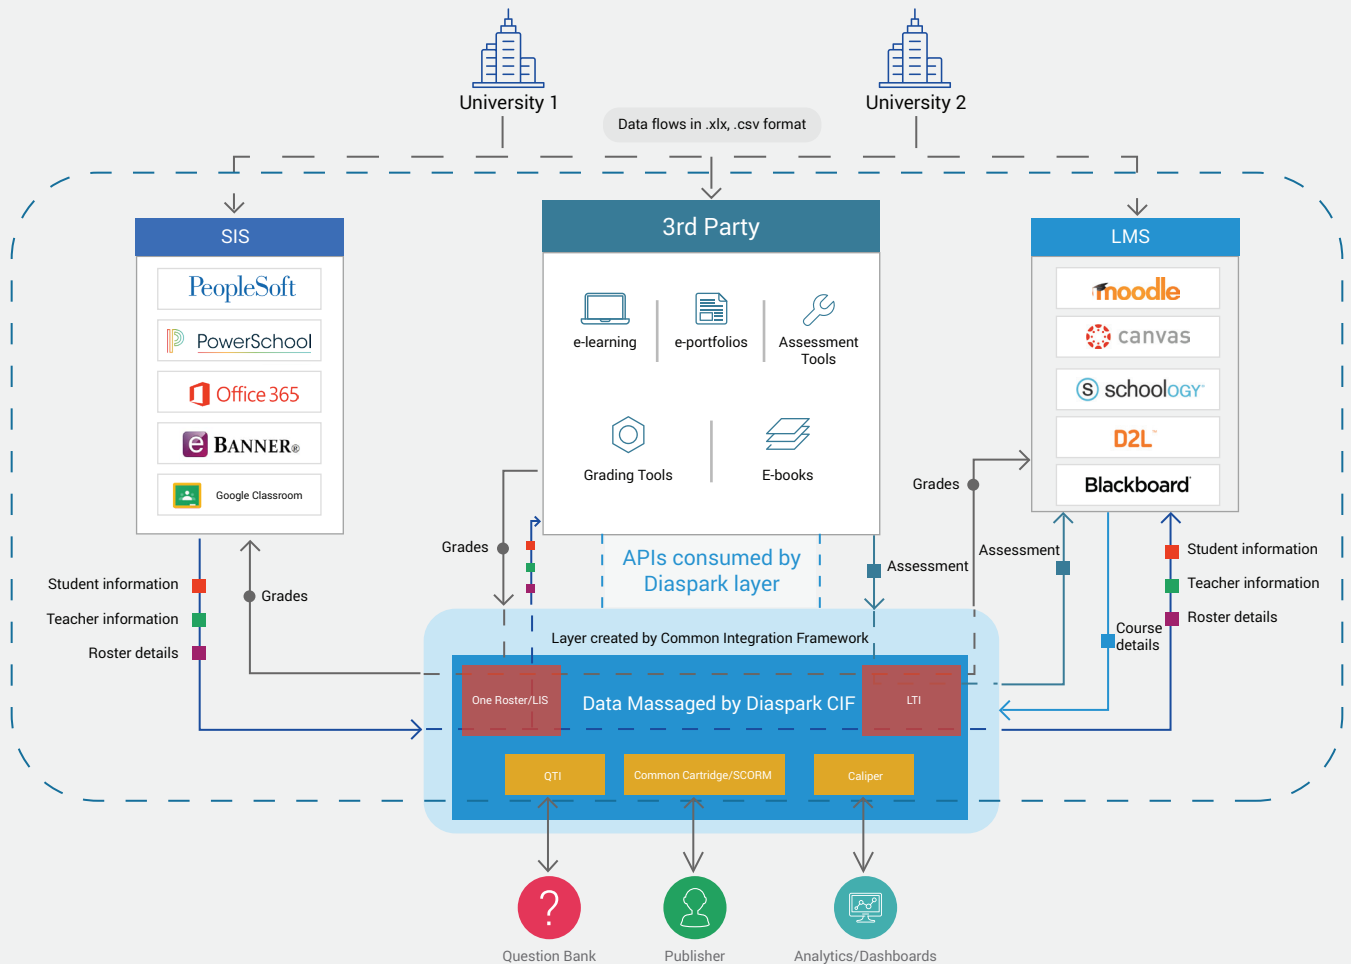

## Common Integration Framework

### Integration Framework supports following industry compliance standards

We will continue to evolve this framework, and support additional industry standards

### How does framework simplifies accessibility across platforms

# Common Integration Framework

Compliant | Modular | Scalable

Built to meet your specific integration objectives

## Providers

We want to

- be LTI compliant
- be OneRoster / LIS compliant
- automate exchange of data between LMS and/or SIS
- integrate with Question Banks, make us QTI compliant
- utilize Caliper to capture events in LMS and our system
- integrate with Content providers (Common Cartridge / SCORM compliant)

## Student Information System

We want

- to be OneRoster / LIS compliant, so we can expose our data to LMS in standard format
- to utilize a compliant framework through which we can integrate with any school, without custom integration efforts each time

## Learning Management System

We want

- to be OneRoster / LIS compliant, so we can integrate with any SIS which is compliant
- to be Caliper compliant, and create Dashboards or/expose that data to SIS / schools / third party providers

## Schools / Universities

We want to utilize a compliant framework through which we can integrate with any SIS or LMS, without manipulating our data format for each of them

"Most importantly, framework will be integral part of your product eco-system, and comply to industry standards for integration. **Lets talk!**"
